THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES. PURSUANT TO THE MEANING OF THE ESPIONAGE ACT OF U. S. C. 74 AND 75, AS AMENDED, ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1

1. A contract between the U.S.S.R. and the government of the Soviet Zone of Germany for the establishment of a radio teletype line between Berlin and Moscow was signed in Moscow some time ago. The line has so far not been established since no suitable transmitter could be provided by the Germans. The Soviets are again pressing for the establishment of this line.
2. More than one year ago, the German postal administration ordered modern frequency telegraph instruments of FT3 type from the Sachsenwerk Radeberg (SAG Kabel). However, the negotiations thus far conducted indicate that the sets ordered probably cannot be supplied. Therefore, a radio telegraphy line will have to be established instead. The radio line will be operated on frequencies of 5,335 kc, 7,784 kc, and 10,210 kc.
3. The following frequencies are required for FT3 sets:

	Channel 1	Channel 2	Channel 3
Cut-off frequency	540 kc	1,260 kc	1,980 kc
Converter frequency	697 kc	1,429 kc	2,153 kc
Signal frequency	900 kc	1,620 kc	2,340 kc
